Daily Number Theory Drill #7 — Speed Sheet

Sheet by David Akinyele-Aje

Section	Topic	Questions	Target time
A	Rapid Recognition	10	2 min 30 sec
B	Manipulation Drills	10	8 min
C	Substitution & Structure	8	10 min
D	Challenge	5	15 min

New toolkit today: Combinatorial Number Theory · Divisor Counting · Synoptic Mastery.

Section A Rapid Recognition ($\leq$15 s each)

Primes, moduli, and basics. Pure recognition.

1. Find the prime factorisation of 91.

Ans: 7×13

2. What is the last digit of 3^{20}?

Ans: 1

3. Find $\gcd(144, 60)$.

Ans: 12

4. Compute $12 \times 13 \pmod 5$.

Ans: 1

5. What is the smallest prime factor of 323?

Ans: 17

6. How many positive divisors does 28 have?

Ans: 6

7. Compute $5^3 \pmod 6$.

Ans: 5

8. Find $x \pmod 7$ if $4x \equiv 1 \pmod 7$.

Ans: 2

9. What is the remainder when 10^{10} is divided by 9?

Ans: 1

10. Which is larger: 2^{30} or 3^{20}?

Ans: 3^{20}

Section B Manipulation Drills ($\leq$50 s each)

Index laws, modular equations, and divisor counting.

1. Find the last two digits of 7^4.

Ans: 01

2. How many trailing zeros are there in 20!?

Ans: 4

3. Find the smallest positive integer n such that $120n$ is a perfect square.

Ans: 30

4. Find the largest power of 3 that divides 50!.

Ans: 22

5. Find the unique pair of positive integers (x, y) such that $x^2 - y^2 = 17$.

Ans: (9, 8)

6. What is the remainder when 3^{100} is divided by 10?

Ans: 1

7. Solve for x in the range $0 \leq x < 11$: $3x + 4 \equiv 6 \pmod{11}$.

Ans: 8

8. Find the sum of the positive divisors of 50.

Ans: 93

9. How many prime numbers are there strictly between 40 and 50?

Ans: 3

10. Find the smallest three-digit positive integer that leaves a remainder of 2 when divided by $3, 4$, and 5.

Ans: 122

Section C Substitution & Structure ($\leq$90 s each)

Synoptic links connecting number theory to algebra and combinatorics.

1. Find the product of all positive integers $n < 50$ that have exactly three positive divisors. *(after SMC 2015 Q16)*

Ans: 44100

2. Find the smallest positive integer n such that n has exactly 15 positive divisors. *(after SMC 2018 Q20)*

Ans: 144

3. How many positive divisors of $3^5 \times 5^4 \times 7^3$ are multiples of 45? *(after SMC 2021 Q19)*

Ans: 64

4. How many positive divisors of 10! are perfect squares?

Ans: 30

5. What is the greatest possible value of $\gcd(n^2+5, n+2)$ for a positive integer n?

Ans: 9

6. Find the sum of all digits of the number $10^{15} - 2026$.

Ans: 126

7. Find all pairs of positive integers (x, y) such that $x^3 - y^3 = 37$. *(after SMC 2023 Q1)*

Ans: $(4, 3)$

8. Find the smallest positive integer x such that $x \equiv 1 \pmod 3$, $x \equiv 2 \pmod 4$, and $x \equiv 3 \pmod 5$.

Ans: 58

Section D Challenge (TMUA / SMC difficulty)

Insight over computation. Each question has a short, elegant solution — find it.

1. How many integer pairs (x, y) satisfy the equation $x^2 + xy + y^2 = 7$? *(after SMC 2023 Q10)*

Ans: 12

2. For how many integers $n \in \{1, 2, \ldots, 100\}$ is n^n a perfect square?

Ans: 55

3. Find all pairs of positive integers (a, b) such that $a^2 - 4b^2 = 45$. *(after MAT 2021 Q1)*

Ans: (7, 1), (9, 3), (23, 11)

4. What is the largest prime factor of $2^{16} - 1$?

Ans: 257

5. If p and q are prime numbers such that $p^2 - 2q^2 = 1$, find the value of $p + q$. *(after SMC 2023 Q17)*

Ans: 5
